26th Practice Update in Neurology

Description

The field of neurology is progressing rapidly on all fronts, spurred by advances in imaging, basic science, translational research, and therapeutics. The clinician caring for the patient with a neurological complaint is now faced with informational overload when attempting to apply evidence-based medicine to an individual patient. The goal of this conference is therefore to distill key aspects of patient diagnosis and management in important, prevalent, dangerous, and treatable neurologic conditions. The conference will emphasize updates in practical knowledge of commonly encountered problems across a broad array of neurological subspecialty areas. Presentations are geared toward both medical internists and practicing neurologists, looking for relevant clinical pearls and expansion of their knowledge in areas such as: headache, stroke, cerebral aneurysms, multiple sclerosis, and normal pressure hydrocephalus.

Who Should Attend

This activity is intended for internists, primary care physicians, family practitioners, physician assistants, nurse practitioners, neurologists, gerontologists, rehabilitation physicians and other interested individuals, particularly those who see patients in the outpatient setting.

Objectives

After attending this activity, the participant will demonstrate the ability to:

- Describe effective, practical strategies for evaluation and treatment of patients presenting with a variety of specific neurological complaints in the outpatient setting.
- Name the appropriate tests and medications used in workup and treatment of selected outpatient neurological diseases, and describe their common limitations.
- List two alternative differential diagnoses for each of the selected neurological complaints.
- Identify characteristics of neurological outpatients appropriate for referral to specialty consultation.
- List limitations of current knowledge and potential future developments in a variety of neurological disorders.

REGISTRATION CUT-OFF DATE:

October 1, 2019

Methods of Payment: We require full payment prior to the start of the activity. Onsite payments by credit card only. The registration fee includes instructional materials, continental breakfast, refreshment breaks and lunch.

Physicians\$250

Residents*/Fellows*/Nurses/NPs/

PAs/Allied Health Professionals \$170
