

43rd Annual Medical and Surgical Gastroenterology: A Multidisciplinary Approach

The Hythe Vail
715 West Lionshead Circle
Vail, Colorado 81657

February 26 – March 1, 2026

This activity has been approved for *AMA PRA Category 1 Credits™*.

DESCRIPTION

We continue to see great advances in the diagnosis and treatment of gastrointestinal and liver disease. Therapy continues to evolve in multiple directions. There are constantly new medications being approved for inflammatory bowel disease. The line is also blurring between the traditional realms of endoscopy and surgery. We are now seeing novel endoscopic approaches for the treatment of GERD, Barrett's esophagus, and acute pancreatitis. To maintain their practices, gastroenterologists and surgeons need to stay up to date on a wide range of topics including approach to resecting the difficult polyp, understanding the best approach to withdrawing therapy in IBD, as well as for management of ischemic colitis, and an update on management of metabolic dysfunction-associated steatohepatitis (MASLD); yet formal education in these areas is limited. It is difficult for practicing physicians and surgeons to stay abreast of these new advances. This year we pay special emphasis on inflammatory bowel disease with a whole day dedicated to the topic, including the addition of two distinguished outside speakers. Please join us for the Medical and Surgical Gastroenterology – A Multidisciplinary Approach - this is the 42nd year for the course!

WHO SHOULD ATTEND

This activity is intended for gastroenterologists, surgeons, internists, family practitioners, physician assistants, nurse practitioners, nurses and other allied health professionals.

OBJECTIVES

After attending this activity, the learner will demonstrate the ability to:

- Identify recently approved therapies for Crohn's and ulcerative colitis.
- Identify updates in the management of HBV and HCV.
- Restate the endoscopic options for the patient with PSC related bile duct strictures.
- Describe the surgical approach to pancreatic cancer.
- Describe the surgical options available to patients with cholangiocarcinoma.
- Review state-of-the-art management for patients with hereditary polyposis syndromes.

ACKNOWLEDGEMENT

Applications for commercial support from health care related industries are pending. A complete list of contributors will be provided in the syllabus. Please note that commercial support received is solely for the educational component of the activity and will not be used to provide food and beverage.

Please note: The Physician Payments Sunshine Act was enacted by Congress to increase public awareness of financial relationships between drug and medical device manufacturers and physicians. In compliance with the requirements of this Act, the commercial supporter/s of this activity may require the Johns Hopkins School of Medicine to report certain professional information (such as name, address, National Provider Identifier (NPI), and State License number) of physician attendees who receive complimentary food and beverage in conjunction with a CME activity. The commercial supporter is required to submit the collected data to the Centers for Medicare and Medicaid Services which will then publish the data on its website.
