Updates in Thyroid and Parathyroid Disease Workup and Management

November 13, 2026

Online Virtual

DESCRIPTION

This course provides updates to thyroid and parathyroid surgical disease, including diagnosis, treatment and surgical management options for patients who have benign and malignant pathologies of the endocrine head and neck. This is a virtual didactic course that provides a comprehensive overview of treatment strategies for different disease processes taught by a multidisciplinary group of physicians at Johns Hopkins Medicine. The recommendations will be based upon contemporary and up to date guidelines published within the past decade.

WHO SHOULD ATTEND

This activity is intended for and otolaryngologists, endocrinologists, and allied health professionals.

OBJECTIVES

After attending this activity, the learner will demonstrate the ability to:

- Summarize work up and treatment options for hyperparathyroidism.
- Identify when to deescalate thyroid cancer care for low risk thyroid cancer.
- Evaluate the neoadjuvant treatment options for aggressive thyroid cancer.
- Describe different surgical approaches and decision making.
- Discuss candidacy for ablative treatments for appropriate patients with benign thyroid disease.

The Johns Hopkins School of Medicine takes responsibility for the content, quality and scientific integrity of this CME activity.

This activity has been approved for AMA PRA Category I Credits™.
