PALLIATIVE CARE IN END STAGE NEURODEGENERATIVE DISEASE

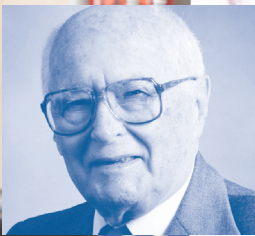

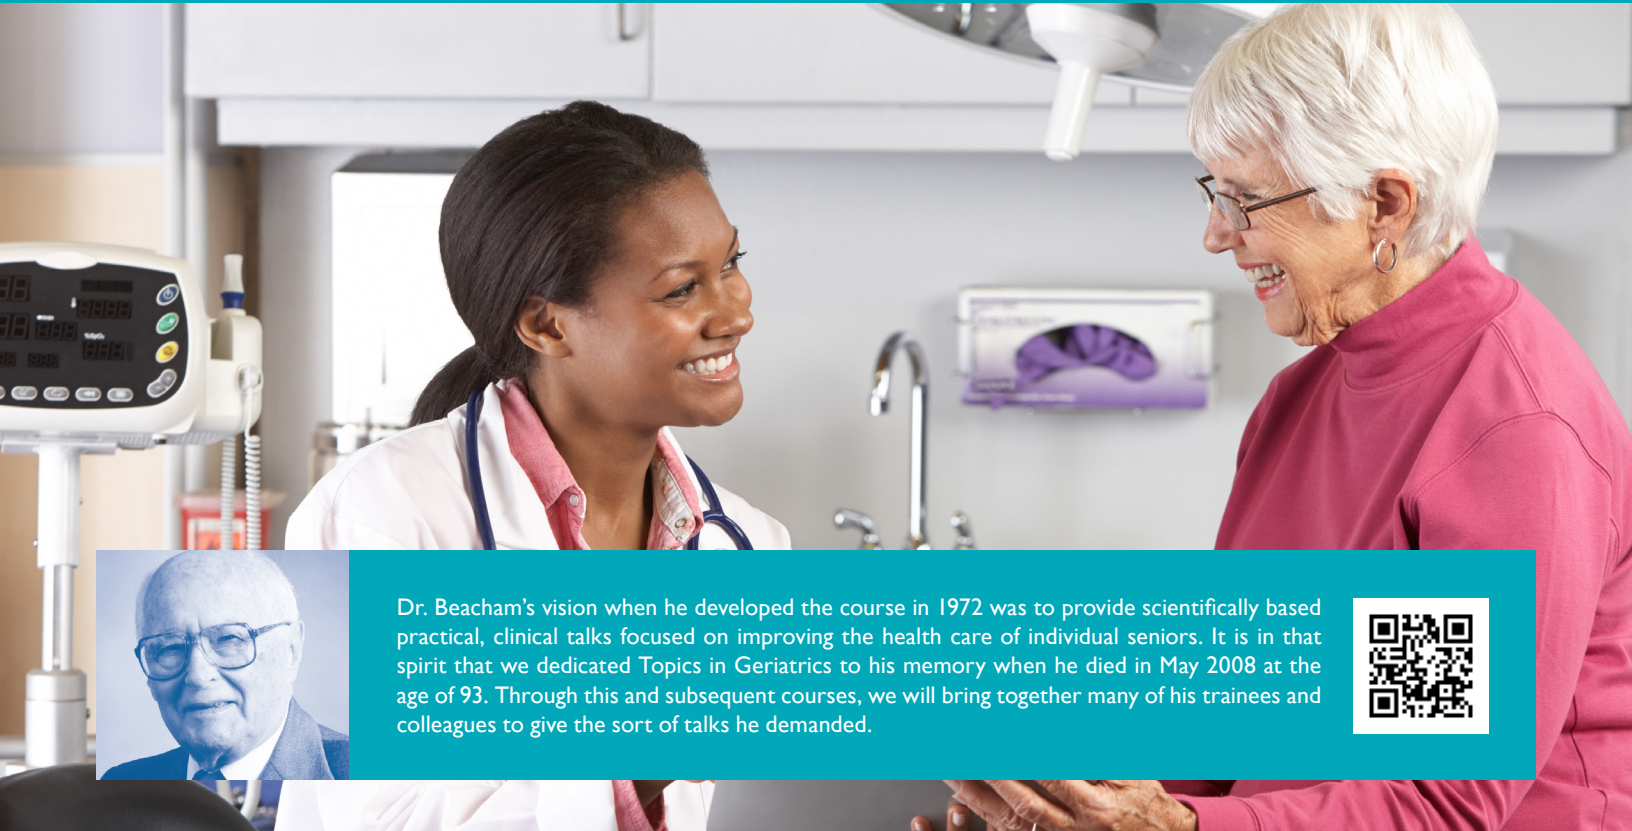

Wednesday, March 4, 2020

Turner Building at Johns Hopkins School of Medicine

5:30 p.m. – 7:30 p.m.

Pre-Registration Required To Attend

This activity has been approved for *AMA PRA Category I Credits™*.

Dr. Beacham's vision when he developed the course in 1972 was to provide scientifically based practical, clinical talks focused on improving the health care of individual seniors. It is in that spirit that we dedicated Topics in Geriatrics to his memory when he died in May 2008 at the age of 93. Through this and subsequent courses, we will bring together many of his trainees and colleagues to give the sort of talks he demanded.

# Edmund G. Beacham 47th Annual Current Topics in Geriatrics

## DESCRIPTION

As the older adult population continues to increase and live longer, it is imperative that we offer high quality continuing education in the care and management of geriatric patients. Most physicians have received very little or no formal geriatrics training, despite this growing trend in the number of older adults they care for. Surveys demonstrate that physicians commonly report discomfort and dissatisfaction with providing care to the older adult. Further, studies evaluating standard quality indicators for the care of the vulnerable older adult show quite poor quality of care. Older adults with multiple co-morbidities report high rates of dissatisfaction with their health care.

This activity is designed to provide practical information to clinicians and healthcare professionals who care for elderly patients. It will improve knowledge about diseases and syndromes common in the elderly and offer practical and effective guides to their management.

## WHO SHOULD ATTEND

This activity is intended for geriatricians, internists, family practitioners, physician assistants, nurses, nurse practitioners, social workers, pharmacists, physical therapists and other health professionals involved in caring for older adults.

## OBJECTIVES

After attending this activity, the learner will demonstrate the ability to:

- Recognize common geriatric syndromes and initiate treatment for these syndromes.
- Identify approaches to and limits of management of specific disease of organ systems that are common in the elderly, e.g. Alzheimer's Disease, hypertension and diabetes.
- Describe important research developments that influence the clinical care of geriatric patients.
- Describe the dynamic nature of current support of primary care practice for seniors and the opportunities to improve quality of care.

## ACCREDITATION STATEMENT

The Johns Hopkins University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

## CREDIT DESIGNATION STATEMENT

The Johns Hopkins University School of Medicine designates this live activity for a maximum of 22.75 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

## NURSING CREDIT

**American Nurses Credentialing Center (ANCC)** accepts *AMA PRA Category 1 Credit™* from organizations accredited by the ACCME.
