MEDICINE

Description

This course will provide speech-language pathologists with an update on current practice patterns and evidence-based research in the field of dysphagia covering adult and pediatric populations across multiple etiologies (neurogenic, head and neck cancer, GI).

Who Should Attend

This activity is intended for speech-language pathologists.

Objectives

After attending this activity, the participant will demonstrate the ability to:

- Describe the anatomy and physiology of normal feeding and swallowing.
- Explain the neural basis of coexisting swallowing and communication disorders after stroke.
- State functional outcomes associated with dysphagia.
- State the effects of medical interventions, such as, chemoradiation and mechanical ventilation or swallowing.
- Describe current evidence-based practices in otolaryngology, gastroenterology, pediatrics and speech-language pathology intervention to treat dysphagia.
