Special Pre-Conference Session

EMBRACING PRIMARY CARE

Wednesday, March 6, 2019

Johns Hopkins Bayview Medical Center

5:30 p.m. – 7:30 p.m.

PRE-REGISTRATION REQUIRED TO ATTEND

Dr. Beacham's vision when he developed the course in 1972 was to provide scientifically-based practical, clinical talks focused on improving the health care of individual seniors. It is in that spirit that we dedicated Topics in Geriatrics to his memory when he died in May 2008 at the age of 93. Through this and subsequent courses, we will bring together many of his trainees and colleagues to give the sort of talks he demanded.

This activity has been approved for AMA PRA Category I Credits™.

JOHNS HOPKINS
MEDICINE

Description

As the elderly population continues to increase and live longer, it is imperative that high quality continuing education in the care and management of seniors is available. Many physicians and other health care providers have received little or no formal geriatrics training, despite this growing trend in the number of elderly patients. Surveys demonstrate that health care professionals commonly report many challenges in providing care to the elderly, especially in the primary care setting. Further, studies evaluating standard quality indicators for the care of the vulnerable elderly show adherence that is not yet ideal.

The Edmund G. Beacham Annual Current Topics in Geriatrics course will provide practical information to clinicians and other health care professionals who care for elderly patients. The course will improve knowledge about diseases and syndromes common in seniors and offer practical and effective guides to management of the complex older patient.

Who Should Attend

This activity is intended for geriatricians, internists, family practitioners, physician assistants, nurses, nurse practitioners, social workers, pharmacists and other health professionals involved in caring for seniors.

Objectives

After attending this activity, the participant will demonstrate the ability to:

- Recognize common geriatric syndromes and initiate treatment for these syndromes.
- Identify approaches to and limits of management of specific disease of organ systems that are common in the elderly, e.g. Alzheimer's Disease, hypertension and diabetes.
- Describe important research developments that influence the clinical care of geriatric patients.
- Describe the dynamic nature of current support of primary care practice for seniors and the opportunities to improve quality of care.

Accreditation Statement

The Johns Hopkins University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

National Commission on Certification of Physician Assistants PAs may claim a maximum of 20.25 Category 1 credits for completing this activity. NCCPA accepts *AMA PRA Category 1 Credit™* from organizations accredited by the ACCME or a recognized state medical society.
