

Inaugural Endometrial Cancer Symposium:

How Preventive and Precision-Based Approaches will Improve Patient Outcomes

JULY 29-30, 2022

HYBRID: IN-PERSON/VIRTUAL

CHEVY CHASE CONFERENCE CENTER

THE JOHNS HOPKINS HOSPITAL | BALTIMORE, MD USA

- Identify why endometrial cancer is one of the fastest growing cancers in women, risk factors for the disease, and strategies for prevention.
- Discuss the role and importance of molecular/genomic testing in endometrial cancer to identify actionable mutations that can be targeted with novel therapies.
- Appraise the role of surgery, chemotherapy, radiation and immunotherapy in treating endometrial cancer.
- Discover novel study designs for implementing clinical trials in patients with rare endometrial cancers.

Symposium Director: Amanda Nickles Fader, MD

Co-Directors: Rebecca Stone, MD/MS, Anna Beavis, MD/MPH,
Stephanie Gaillard, MD/PhD

Sponsored by The Laughlin Family Foundation and
The Johns Hopkins Kelly Gynecologic Oncology Service
